

Vacancy

Quality Assurance & Compliance Manager

A Sime Darby Plantation Company

For our QA department in Zwijndrecht we are currently recruiting a:

Quality Assurance & Compliance Manager

In this fulltime job you are responsible for managing the QA teams and to ensure that all quality, food safety and supply chain compliance and legislative issues are addressed. You also make sure that all QA systems and procedures are such that they address the needs of the business, it's customers and third party accreditation schemes appropriate for the operation.

Main tasks & Responsibilities

The main tasks and responsibilities are:

Supply Chain Compliance

- Ensure business is complaint with all relevant supply chain standards including: RSPO, Rainforest Alliance and FOSFA 92 - Shipping
- Ensure all supply chain food safety issues are addressed including procedures to prevent potential contaminants entering the supply chain.
- Report to business managers on updates and changes to any of the requirements of these standards.

Business Representation

- Represent the business on Technical industry body panels and organisations such as: FEDIOL, SCOPA and MVO
- Report to the business on communications to and from these organisations and report on the outcomes of meetings etc.

Legislation

- Keep abreast of all quality, food and feed safety legislation relevant to the business. Circulate summaries of new and changes to relevant legislation to managers in the business.
- Ensure systems are in place to demonstrate compliance with all quality, food and feed safety legislation related to the business

Quality Assurance

- Drive the review, update and simplification of the QA and Food Safety systems on the Zwijndrecht site, focussing on business needs, customer requirements and ensuring necessary 3rd party accreditation scheme requirements are met.
- Ensure all internal, 2nd and 3rd party audits are completed as planned.
- Be present at customer and 3rd party audits where appropriate.
- Ensure that all non-conformances are addressed within the required time lines.
- Work with the Site Management Team to drive the follow up of all non-conformances, customer complaints and internal incidents, facilitating the "Root Cause Analysis" process ensuring that corrective actions are established and implemented.
- Keep abreast of updates and changes to 3rd party standards ensuring that the site implement any required changes to systems and procedures to remain compliant to those standards

Vacancy

Quality Assurance & Compliance Manager

A Sime Darby Plantation Company

Quality Control

- Manage the team of Laboratory staff ensuring that all testing is carried out and reported as per the testing schedule.
- Ensure that equipment is properly maintained and is kept in good working order
- Ensure the business is kept abreast of new developments in instrumentation for the analysis of oils and fats
- Support the operations teams in the performance of product analysis in the field

About you

- Bachelor or University degree (Food / Food Science / Food Processing related preferred)
- You have at least 10 years of experience in a QA role in the food or process industry
- You have managerial experience
- Knowledge of HACCP and general Food Safety Processes
- Knowledge of QA and Food Safety systems such as FSSC2200 and the BRC Standard
- You are a professional in oral and writing skills in Dutch and English
- Knowledge of oils and fats and their processing would be an advantage.
